

What We Do

We provide sales, installation, repair and maintenance on a wide variety of wireless networking devices.

Why Are We Different

We are constantly researching all the reasons why many wireless systems don't work as planned (or promised). We have used our extensive experience in the IT world to help correct (and prevent) these problems.

"We believe you have to have lived and breathed in the computer world before you can truly deliver in the wireless world."

- Thomas Schwartz, CEO & Founder

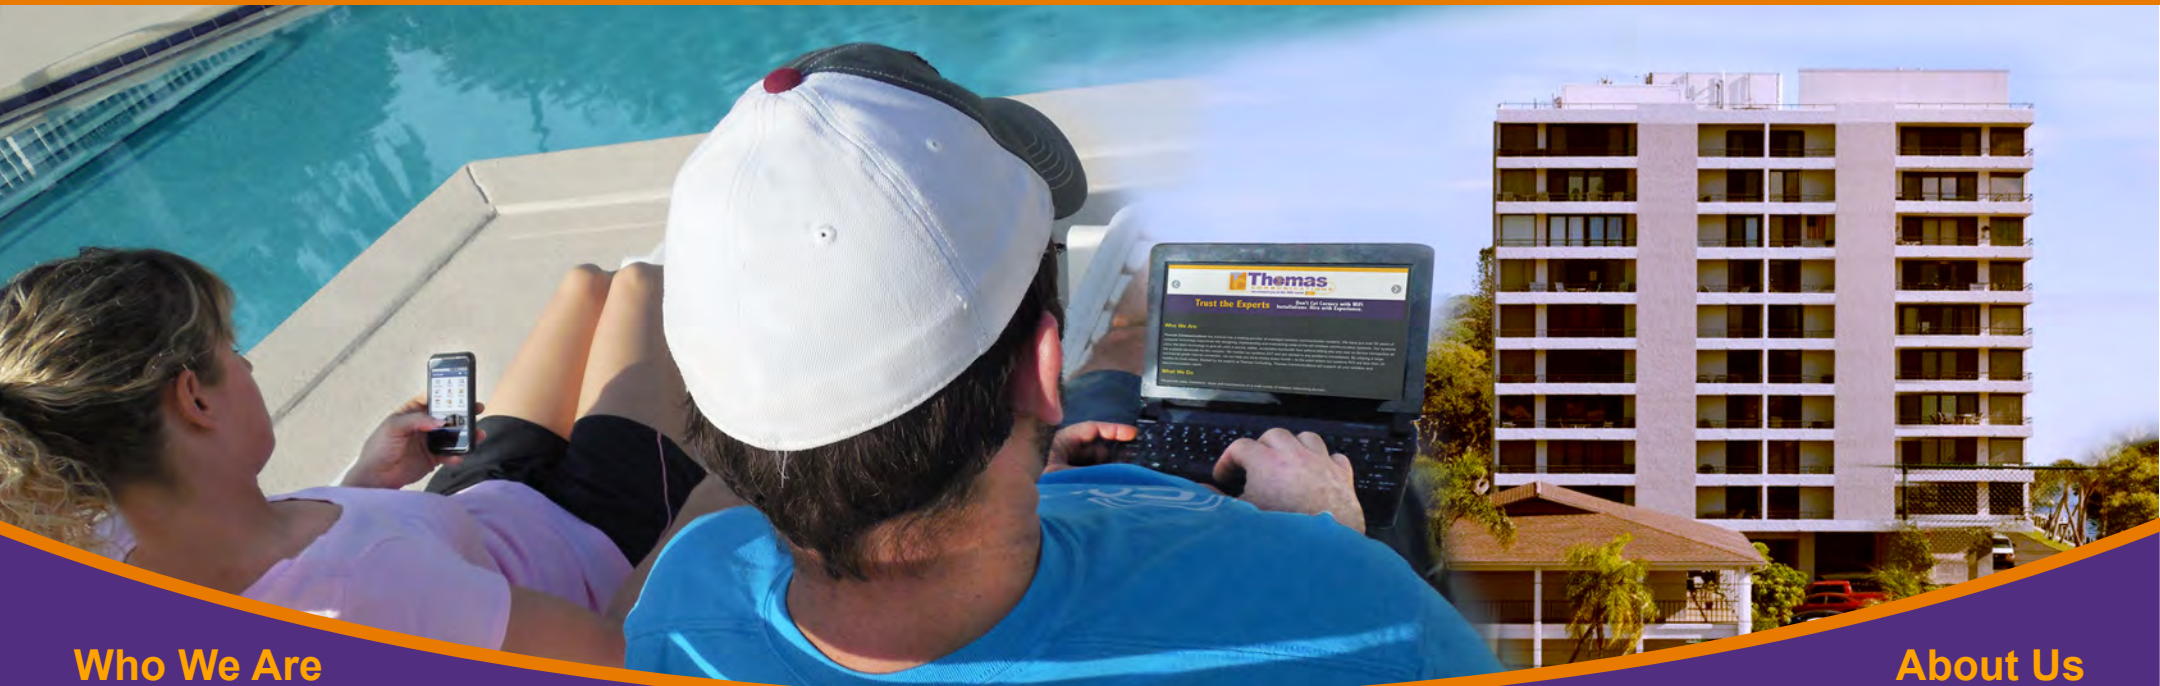

4709 Thomas Hobby Place
Sarasota, Florida 34241

Trust the Experts

Don't Cut Corners With Wifi Installations. Hire With Confidence.

About Us

Thomas Schwartz has been doing business locally and nationally working with computers, phone systems and wireless networks for over 36 years.

Casey Ruark has been doing international, national and local business working with computers, networking, firewalls, phone systems and wireless networks for over 26 years.

With the great team of experts available at Thomas Consulting, LLC, along with the professional relationships formed over the years with other experienced technicians; you can count on us for all your wireless and telecommunication needs!

Return On Your Investment

Once our system is installed, our clients have seen an ROI in 14 months or less. It pays for itself in a very short time and then helps save everyone money!
